

The Andaman Sea was hit by light rains, with heavy rains in Odisha from the 2nd

A low pressure area was created in the Andaman Sea this morning. The epicenter was reported below the Pacific Ocean floor, however; no tsunami alert was issued. The wind will blow from midnight on the 3rd. The wind speed is estimated at 45/50 km / h.

It is expected to reach the coast of South Odisha-North Andhra Pradesh on the morning of the 8th. On the other hand, there will be heavy rain in some places on December 5. Even if you reach the coast, the storm will not cross the coast immediately. The storm will move northeast along the coast. Coastal Odisha is expected to be affected by the storm.

Heavy rains are expected in southern and coastal Odisha. Yellow warnings have been issued in nine districts of Odisha. The meteorological department has issued yellow warnings in Ganjam, Gajapati, Puri, Jagatsinghpur, Kendrapara, Baleshwar, Cuttack and Khordha districts. The meteorological department has advised fishermen not to venture into the sea as the sea is expected to be rough by the next 2 days.
